

## **For Employers**

### **Announce Your Employment Opportunity**

- Announce your employment opportunity to undergraduate students, graduate students, or both student populations
- Announce your forthcoming visit to the UA campus and invite or solicit contact from interested students
- Announce your employment opportunity to both HWR and collaborating departments (We can send your announcement to colleagues in Civil Engineering, Geological Engineering, Chemical/Environmental Engineering, Geosciences, Soil/Water/Environmental Science, etc.)

### **Schedule On-Campus Events\* or Request Resumes**

- Schedule an on-campus presentation or an informal meeting with HWR students at the department
- Request resumes from a specific population of students *or* from students with specific areas of interest (e.g. groundwater modeling, surface water modeling, GIS applications, water chemistry/water quality, hydroclimatology-hydrometeorology, water resources systems, decision-making, planning)
- Arrange pre-selected or open interviews for HWR students at the department

### **Staff Contact**

To announce your employment opportunity, schedule an on-campus event at the department, or request resumes, contact Terrie Thompson in the Academic Advising Office: [terrie@hwr.arizona.edu](mailto:terrie@hwr.arizona.edu) or 520-621-3131.

\*If you wish to interview or meet a larger group of students—those from multiple departments and other colleges—or those from a variety of majors, you may need more extensive facilities than the department can provide. If so, you may want to consider scheduling your on-campus event with the University of Arizona Career Services office [hyperlink: <http://www.career.arizona.edu>]. Please contact us for advice or more details.
